

## Threading: the future of beauty is here

IS THIS NEW TREATMENT THE END OF SURGICAL FACELIFTS, LASER, BOTOX AND DERMAL FILLERS? IT JUST MIGHT BE.

“Threading refers to the procedure where tiny “threads” are strategically placed [injected into skin], guided by the natural tension lines of the skin to act as a scaffold, lifting loose and sagging skin, ” explains Dr Maureen Allem, Exco member of the Aesthetics and Anti-ageing Medicine Society of South Africa (AAMSA) and founder of Skin, Health and Body Renewal.
