

Dr Bianca le Feuvre

Dr Bianca Le Feuvre is a GP with a special interest in Aesthetic, Anti-Ageing & Cosmetic Medicine who joined the Skin Renewal team in March 2010. She is based in Cape Town and works between the Claremont, Cape Quarter and Constantia branches. She is a member of The Aesthetic and Anti-aging Medicine Society of South Africa.

Winter Skin Treatments

Even though dull complexion, uneven and rough skin are often associated with winter months, the limited sun exposure during these months makes it a perfect time to explore the latest treatments and technologies that leave the skin radiant and fresh.

Lifeless skin's best solution is exfoliation, as it assists in removing the dead cells. Topical exfoliation on a regular basis is important, however treatments such as chemical peels, laser treatments and skin needling work on a deeper level and assist in faster cell turnover.

Skin Renewal offers treatments such as the 3D peel and the Pearl Laser, which are ideal during the winter months. These state of the art technologies are perfect for exfoliation on a deeper level. The top layer of the skin is treated with the Pearl Laser. Light pulses are used in a pre-selected pattern, while heat is sent to the deeper layers of the skin for long-term benefits. The 3D peel is used for more advanced skin problems. It is a 3-peel

medium depth chemical peel system, which addresses a wide range of skin conditions with great efficacy.

Combination treatments achieve fantastic results. The doctors on the Skin Renewal team develop a tailor made treatment program for each client, as everybody's skin is unique and require something different. "Our continuous investment in the latest anti-ageing technologies allow us to offer combination treatments, giving infinitely better results", says Dr. Maureen Allem, founder and medical director at Skin, Body & Health Renewal.
