

## Skin Rejuvenation With The New Fraxel™ DUAL

Somehow, booking the family's summer holiday dropped off my *to-do* list and only through sheer determination did I avoid total rejection from my loved ones. I have now managed to book a spectacular summer vacation and next on my '*new-to-do*' list is skin rejuvenation to ensure that my skin looks great. After all, that's what a holiday is all about; leaving the make-up bag at home so that I can relax during my holiday.

I have chosen the Fraxel™ DUAL as it effectively treats sun damage, wrinkles and pigmentation with dramatic results and hardly any downtime. Fraxel™ DUAL is gentle and FDA approved to resurface your skin from the inside out.
