

Dr Bianca le Feuvre

Dr Bianca Le Feuvre is a GP with a special interest in Aesthetic, Anti-Ageing & Cosmetic Medicine who joined the Skin Renewal team in March 2010. She is based in Cape Town and works between the Claremont, Cape Quarter and Constantia branches. She is a member of The Aesthetic and Anti-aging Medicine Society of South Africa.

Ceccarelli Fat Lipolysis®

Some people experience, no matter what diet they try or how consistently they exercise, problem areas that just won't budge. Getting rid of these resistant fat pockets requires a slightly different approach and the new Ceccarelli Fat Lipolysis® treatment will do the trick.

The Ceccarelli Fat Lipolysis breaks down fat in those areas not responding to anything else, such as hips, tummy, upper thighs, love handles and saddle bags. The Ceccarelli lipolytic solution, when injected, uses the body's metabolism to act on fat cells, causing natural fat destruction.

A physiological solution of vitamin C and iron is used for this treatment, which makes this treatment safe. Even so, it is important for this treatment to be scripted and administered by a qualified doctor.

Results can be seen after one day, with best results showing after 2 weeks. One to three treatments are needed – where similar Lipodissolve treatments would require 6–8 treatments.

There is also minimal swelling with the Ceccarelli fat dissolve, whereas other similar Lipodissolve treatments causes massive swelling.

It works well as a stand-alone treatment for external fat, but combined with the Slender Wonder program

which will reduce internal fat, you have a winning combination for weight reduction and re-sculpting the body.

At Body Renewal, each patient is assessed by one of the doctors on the team to ensure that each patient receives treatments suited to their specific needs.

If you are ready to whip your body into shape and to find out more about Ceccarelli Fat Lipolysis®, contact 086 126 3972 or visit www.bodyrenewal.co.za
