# Get your Skin in Top Condition

It is official - the silly season is upon us once again and calendars are filling up with parties requiring us looking and feeling our best. To ensure a glowing, smooth complexion accompanying us to the line-up of events it is essential not to leave treatments to the last minute.

The following treatments will leave skin in top condition:

## **Silhouette Soft Suspension Sutures Lifting Technique**

The insertion technique of this treatment - which is ideal for those who want a lift without surgery - has been refined over the years. Improved lifting results are seen when three sets of 8-Cone Silhouette threads are inserted mid-face.

## **Dermaquest C-Infusion Peel**

This peel, known as an antioxidant powerhouse, revitalizes the skin while removing sluggish cells. Dull and lifeless skin particularly benefit from this peel. Three peels over a nine-week period are recommended.

## **Jett Plasma Skin Tightening Treatment**

This non-ablative treatment gently stimulates deeper lying cells responsible for making collagen, elastin and Hyaluronic Acid.

Initially a number of consecutive treatments are required after which time results can be maintained by having a treatment with your monthly facial, where you can target specific ageing areas, such as the eyes, mouth and cheeks.

## **No Pad Eye Cream by Matriskin**

This topical cream treats large fat pads under the eyes through lipolysis. These pads have been tricky to treat in the past, but the Phosphatidyl Choline found in this medically tested product, along with a number of anti-ageing ingredients allow for fantastic results, in an area normally treated in a clinic.

To find out more about the treatments above, or to see what specials Skin Renewal has on offer over this period, contact Skin Renewal
