

Fraxel™ DUAL – A Game Changer In The Aesthetics Industry

Skin Renewal is constantly keeping abreast of the latest developments in the aesthetics industry and are proud to be launching the latest in fractionated technology – the Fraxel™ DUAL 1550/1927 laser.

Fraxel treatments are not at all a new concept in the market, but the latest Fraxel™ DUAL incorporates 2 lasers in 1, and shows results in as little as 2-3 treatments.

The addition of the 1927 Thulium laser ensures that all forms of pigmentation and pre cancerous skin lesions can be treated, while the upgraded 1550nm Restore wavelength targets skin texture and will improve deep lines and acne scars.

These two lasers can be used together or separately, depending on the patients' needs.

The Fraxel™ DUAL is a gentle, FDA approved treatment, resurfacing the skin from the inside out. It shows dramatic results in the treatment of sun damage, wrinkles and pigmentation with hardly any downtime.

The Fraxel™ DUAL is considered to be a game changer in the aesthetics industry for a number of reasons:

- Visible results are achieved within 2 to 3 treatments.
- Comfort is improved due to an integrated cooling system in the hand piece.
- Any form of pigmentation can be treated, due to the Thulium laser's functionality

Even though treatments would usually include the face, neck, decollete, hands and arms, any problem area can in fact be treated, and is suitable for all skin types.

Depending on the severity of the problem area, 3-5 sessions would be prescribed, at intervals of 2-4 weeks. Even though results are seen within 2-3 treatments, the results are cumulative with the end result showing within 2-3 months.

The skin may feel sunburnt and sensitive the first day after the treatment, but once the skin has renewed itself, there will be an improved texture, an improvement on pigmentation and sunspots, wrinkles will be noticeably reduced and acne scars will be smoother and less visible.

Dr. Maureen Allem, founder of Skin Renewal says: "It is quite a challenge to try and sort out all your ageing concerns in the same treatment session, but every so often, aesthetic technology leaps ahead and gives us a gem like the Fraxel™ DUAL. After much research we selected the Fraxel™ DUAL as the perfect resurfacing laser for our patients as it delivers impressive results with the least amount of downtime."

If you'd like to find out more about the Fraxel™ DUAL, contact Skin Renewal on 0861 754 672 or visit www.skinrenewal.co.za.
