

Lose Centimeters With Ceccarelli Fat Lipolysis!

Cecarrelli Fat Lipolysis

I am super excited to share my good news: I had my measurements taken at Skin & Body Renewal today, and I am delighted to announce that I have lost an average of 3cm around my tummy. I had my 1st Ceccarelli Lipolysis treatment done about 5 weeks ago, and it has worked wonders. I weighed myself this morning, and I have not lost any weight on the scale, so the 3 cm loss is all thanks to my treatment.

Even before I was measured I could feel that my tummy had trimmed down. In the past week or so, my jeans were not as tight around waist, and I can see how much slimmer I look in my gym clothes. I am now more motivated than ever to lose my excess 5kg.
