

## News24.com's Beauty Editor Marisa Crous on Trends

'Every month we hear about a new, innovative way to look younger. Last year, I witnessed the anti-ageing, non-surgical facelift known as PDO Threading. Done at my local Skin Renewal clinic, it entails embedded threading, a treatment that involves the use of PDO, polydioxanone sutures injected into the hypodermis of the skin. The threads dissolve eventually and the result is fewer wrinkles and an overall improvement in skin texture.

The procedure was fascinating. Not only in its execution but in the sense that whoever thought we would consider planting foreign matter into our faces?!
